PROJECT

Interior Design

G-1

DATE

2017

In the prestigious Mayfair district, in the heart of London, Studio Marco Piva has been commissioned to project the interior design of the Sahrai Milano Flagship store. **The space has been designed as extremely clean and functional, modern and elegant.**

On the ground floor, where the main entrance leads from the street, **the layout has been reorganized to display the carpets and to maintain a vision of the whole space:** a single large area that encloses the visual depth and uniqueness of space, divided only partially by symmetrical walls that act as exhibitors and also separate from the view from the street, to give privacy to the reception and a small meeting area.
