EXHIBITION

ORGANIZER

Sicis

DATE

2006

The underlying idea behind the exhibition Sicis Teatro, held at Teatro dell'Arte in Milan, was linked to the "stage sets" of contemporary living, meaning the city as well the metropolis. The proposal involves a space-time leap that perfectly represents the history of Sicis, the company that in some twenty years of activity has taken mosaic art, and more, from the rigidity of history to become contemporary in all its myriad expressions, exploring new territories of design.
