Hotel Laguna and Hotel Baia: 2020 - 2021

The project of Studio Marco Piva for the entire Chia Laguna Resort complex involved the interior design and restyling of the **Hotel Laguna, Baia di Chia Resort** and **Hotel Village**.

Through a careful selection of furniture and materials that communicate an idea of luxury and well-being, has instead raised the quality from a functional, aesthetic and emotional point of view.

The restyling project has also involved all the points of sale inspired by the nature of the territory, to translate into a new solution characterized by a **Mediterranean lifestyle** designed to offer its guests a place where you can breathe the authentic **Sardinian tradition**.

The theme of **"wild place"** and authenticity was the starting point for the concept design of Studio Marco Piva, which redesigned the environments and outdoor spaces of the resort through landscaping and new lighting, to arrive at a new design in continuum between interior and exterior.
