Sichuan Theatre: 500 sqm

Other spaces: 64.397

Total area: 230.000 sqm

DATE

2019 - in progress

The **Tonino Lamborghini Towers** complex in Chengdu is a latest generation building where hospitality, commercial, cultural and residence functions converge as per Studio Marco Piva design concept.

SMP has been committed to design the **hotel, common spaces, rooms and suites, luxury apartments, commercial area** and the **Sichuan People Art's Theatre**.

Moreover, SMP design team, in collaboration with Donghe and JHM, has carried out an accurate work dedicated to the architectural study of the **podium** and of the 180 m height towers facades.

The project elegantly blends **Chinese** and **Italian** design visual elements: a tribute to two cultures, both with ancient traditions, for a highly scenographic result that has its roots in history, projecting it into the contemporary era.
