

Excelsior Palace Portofino Coast

Rapallo, Italy

HOSPITALITY

CLIENT

Excelsior Palace Hotel S.r.l.

PROJECT

Interior Design & Architecture

BUILT UP AREA

1250 sqm indoor + 350 sqm outdoor

DATE

2020 – in progress

Studio Marco Piva was tasked to design **the renovation and expansion of the SPA and Wellness area** of the 5-star luxury hotel Excelsior Palace in Rapallo.

The project was divided into two main and complementary directions: the conservative restyling of the bar and enhancement of the existing and the expansion of the space and services, with an interior design and architecture inspired by the territory, with its shapes and colors.

The materials such as glass, mirrors and metals with their play of reflections and three-dimensional effects bring the **sea waters vibrations** back into the complex, like Zen waves that permeate the environment with new lifeblood.

Water and fire, the primordial elements of life, **come together in the design of the main swimming pool**, creating a suspended, almost magical effect, which gives feelings of peace and tranquility: **an oasis in which to explore new dimensions of wellness**, entranced by the overhanging view on the sea.
