In the center of the historic "Fiera Milano" district, overlooking the public park, there is the apartment for which Studio Marco Piva has been assigned of designing the interior design. The apartment is developed according to specific housing needs of the client, established in the first design phase.

The objective was to achieve a sophisticated elegance for any environment, which are simple and functional, but at the same time rich in details that emphasize the exclusivity and sophistication of the overall project.

A careful chromatic research was made, selecting contemporary but not invasive colors: a trend-color range that doesn't go out of fashion with the passage of time.
