DATA

2021 - on going

This Private Villa is located in the Bilkent district of Ankara, the cosmopolitan capital of Turkey. The already structured architectural project passed on to Studio Marco Piva for a **unique interpretation of the interior spaces**. The Villa is structured on **5 levels**: a ground floor and two floors above ground for the exclusive use of the property and two semi-underground floors dedicated respectively to guests and wellness areas.

Living the home was the concept that guided the entire interior design process: home for the family and its guests; a warm and welcoming place, in which to indulge in pleasant private moments, comfortable relaxing breaks, evenings with friends.

The selected furnishings made in Italy combined with custom designed elements make each room special. Elegant fabrics cover the floors and walls, swinging between velvety carpets and delicate silk wallpapers.

A Private Villa as **a sensory narration with a custom design** for an idea of conviviality to be experienced for the contemporary home.
