The Architectural project developed by Studio Marco Piva and 5+1AA for the new family resort in Zeralda is located near the Golden Sand Beach.

The coast is now characterized by different tourist complexes, each with its own identity. **The developed project proposes the presence of a clearly defined element: a linear building in east-west.**

**The building will located along the southern boundary of the subdivision. The remaining soil to the north is for the Development of the future waterpark and the construction of a building residential.**

The choice to condense most of the south volume keeps the pinewood existing while minimizing the use of land.
